EDUCATION

Maharaja Agrasen Institute of Technology, GGSIPU
B.Tech, Computer Science Engineering (Specialization: AI)

Sep 2023 – Jun 2027
CGPA: 8.4 / 10

TECHNICAL SKILLS

Programming Languages: C/C++, Java, Python, SQL, HTML/CSS

Machine Learning & AI: Scikit-learn, TensorFlow/Keras, OpenCV, MediaPipe, Computer Vision, NLP, LLM Applications, RAG

Data Science & Analytics: NumPy, Pandas, Matplotlib, Seaborn, EDA, Data Cleaning, Feature Engineering, Statistical Analysis

GenAI & NLP: LangChain, FAISS, Sentence Transformers, Semantic Search, Contextual Search, Tokenization, Prompt Engineering

Backend & APIs: FastAPI, Flask, REST APIs, Backend Development

Tools & Platforms: Git, Docker (Basic), Jupyter Notebook, VS Code

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, OS Fundamentals

EXPERIENCE

MicroKahani Private Limited — SDE Intern

Dec 2025 – Jan 2026

- Developed AI-powered recommendation and semantic search systems for a micro-drama OTT platform serving Digital Kalakaar's 15M+ audience.
- Engineered embedding-based content retrieval pipelines using Sentence Transformers, FAISS, and FastAPI for personalized content discovery.
- Integrated LLM-driven metadata generation and contextual search capabilities to improve user engagement and discoverability.
- Built scalable backend APIs for real-time recommendation and semantic retrieval workflows.

PROJECTS

InsightRAG | RAG + Generative AI

- Built an AI-powered document assistant using FastAPI, Streamlit, Groq, and FAISS for semantic search and Q&A.
- Implemented a RAG pipeline with PDF/TXT upload, embeddings, and vector-based retrieval.
- Enabled ChatPDF-style summarization with source citations and confidence scoring.

Tech Stack: Python, FastAPI, Streamlit, Groq, FAISS, HuggingFace, LangChain, RAG

GitHub: <https://github.com/Gakshat12/InsightRAG>

Fake News Detection using Deep Learning | NLP + Deep Learning

- Built an LSTM-based text classifier achieving ~92% validation accuracy; applied full NLP preprocessing (tokenization, stopword removal, sequence padding) on a large news corpus.
- Trained model in TensorFlow/Keras with accuracy/loss tracking to prevent overfitting; deployed real-time predictions via a Flask web app.

Tech Stack: Python, Pandas, NumPy, NLTK, TensorFlow/Keras, LSTM, Flask, Jupyter, Git

GitHub: <https://github.com/Gakshat12/fake-news-detection>

ACHIEVEMENTS & HACKATHONS

- 1st Prize – HackBMU 2025, BML Munjal University:** Pathshala – AI & AR-powered immersive learning platform for inclusive education.
- Top 3 – Scale+91 Hackathon, FinTech Festival India 2024:** CRYPTXCHANGE – Beginner-friendly DeFi learning and simulated trading application.
- Runner-Up – FISHTANK Pitchathon, Startup Sphere x Careerwill:** XR-VERSE – Service-based startup delivering AR/VR solutions for business training and marketing.
- Top 10 – Haryana Police Hackathon 2025, Hack2Skill:** Nav Yuva Chetna (NYC) – Technology-driven anti-drug awareness and rehabilitation platform.
